This is the fourth volume

in the Indian history series From Indus to Independence: A Trek through Indian History. Its title 'The Onslaught of Islam' is apt, since the book covers the initial period in which the newly founded religion of Islam started to move eastwards. Islam, almost immediately after its inception, had subdued large parts of the western regions of the Middle-East and stemmed the eastward movement of the Byzantine Empire. In ancient and medieval times all invaders of the Indian sub-continent came through the Khyber Pass in the Hindu Kush mountain ranges. The book examines the different invading armies starting with the Persian army of Darius the Great, the invasions of the Kushans and the White Huns, the repeated assaults by Mahmud of Ghazni 'The Hammer of the Idolaters', and the arrival of Muhammad of Ghur into the Indian sub-continent. While describing the military successes and failures of the Islamic armies the book also analyses the philosophical intermingling of cultural and religious ideas. This volume brings the narrative of Indian history

to the establishment of the Delhi Sultanate.

We are caught up in the cycle of so-called "holy wars." In The Jihad of Jesus, Dave Andrews argues that while this inter-communal conflict is endemic, it is not inevitable. Depending on our understanding, our religions can be either a source of escalating conflict or a resource for overcoming inter-communal conflict; and for our religions to be a resource for overcoming conflict, we need to understand the heart of all true religion as open-hearted compassionate spirituality. In the light of an open-hearted compassionate spirituality, we can reclaim the word "jihad" from extremists who have (mis)appropriated it as a call to "holy war," and

reframe it, in truly Qur'anic terms, as a "sacred nonviolent struggle for justice"; and we can reconsider Jesus, as he is in the Gospels, not as a poster boy for Christians fighting crusades against Muslims, but as "a strong-but-gentle Messianic figure" who can bring Christians and Muslims together. As this book shows, many Christians and Muslims have found Isa (Jesus) and the Bismillah (celebrating the mercy, grace, and compassion of God) as common ground upon which they can stand and work for the common good. The Jihad of Jesus is a handbook for reconciliation and action: a do-it-yourself guide for all Christians and Muslims who want to move beyond the "clash of civilizations," join the jihad of Jesus, and struggle for justice and peace nonviolently side by side.

This open access book discusses the impact of human-induced global climate change on the regional climate and monsoons of the Indian subcontinent, adjoining Indian Ocean and the Himalayas. It documents the regional climate change projections based on the climate models used in the IPCC Fifth Assessment Report (AR5) and climate change modeling studies using the IITM Earth System Model (ESM) and CORDEX South Asia datasets. The IPCC assessment reports, published every 6-7 years, constitute important reference materials for major policy decisions on climate change, adaptation, and mitigation. While the IPCC assessment reports largely provide a global perspective on climate change, the focus on regional climate change aspects is considerably limited. The effects of climate change over the Indian subcontinent involve complex physical processes on different

space and time scales, especially given that the mean climate of this region is generally shaped by the Indian monsoon and the unique high-elevation geographical features such as the Himalayas, the Western Ghats, the Tibetan Plateau and the adjoining Indian Ocean, Arabian Sea, and Bay of Bengal. This book also presents policy relevant information based on robust scientific analysis and assessments of the observed and projected future climate change over the Indian region.

This book offers a meaningful and practicable guide to better management of arsenic problems in the groundwater of the Gangetic Plain. It gathers contributions from distinguished researchers who have been actively working in the area for over a decade. The arsenic contamination of groundwater is a growing concern in the central Gangetic Plain, where the

local population's main sources of fresh water are surface water, groundwater and rain water; of these sources, only the last two generally meet the most important criteria for drinking water in their natural state. Natural geological changes are presumed to be the primary reason for arsenic contamination in this region. Further, most of the people living in this area have developed the habit of drinking water (groundwater) from the arsenic-contaminated tubewells in many parts of the region. As a result, many are suffering from arsenicosis and many more are at risk. Since the cause of arsenic contamination in groundwater still remains unclear, this book seeks to address the arsenic issue in this region by pursuing a holistic and systematic scientific approach. Accordingly, it delineates various sources, processes, hypotheses and remedial approaches that are needed to manage the arsenic contamination in the Central Gangetic Plain. *Public Policy Analysis and Design* Taylor & Francis
Is India ready for superpower status or too far behind China to ever

catch up? In his career as one of India's leading journalists and entrepreneurs, Raghav Bahl has often faced this question, and many others, from bewildered visitors: * Why are Indian regulations so weak and confusing? * Why is your foreign investment policy so restrictive? * How come your hotels are world class, but the roads leading to them are so potholed? * Why don't you lower your voice when you make fun of your politicians? * Why do you control the price of oil and cable TV? Clearly there's a huge difference in how India and its arch-rival China work on the ground. China is spectacularly effective in building infrastructure and is now reinvesting almost half its GDP. Meanwhile, India is still a "promising" economy: more than half its GDP is consumed by its billion-plus people, yet India has some unique

advantages: Half its population is under twenty-five, giving it a strong demographic edge; 350 million Indians understand English, making it the largest English-speaking country in the world; and it's the world's largest democracy. In the race to superpower status, who is more likely to win: China's hare or India's tortoise? Bahl argues that the winner might not be determined by who is investing more and growing faster today but by something more intangible: who has superior innovative skills and more entrepreneurial savvy. He notes that China and India were both quick to recover from the financial crisis, but China's rebound was accompanied by huge debt and deflation, with weak demand. India's turnaround was sturdier, with lower debt and modest inflation. So

India's GDP grew twice as fast as China's for a few quarters-the first time that had happened in nearly three decades. And in contrast to China's Yuan, which is pummeled for being artificially undervalued, India's rupee largely floats against world currencies. In the end, it might come down to one deciding factor: can India fix its governance before China repairs its politics? With insights into the two countries' histories, politics, economies and cultures, this is a well-written, fully documented, comprehensive account of the race to become the next global superpower. For anyone looking to understand China, India and the future of the world economy, this is the book to read.
