From the award-winning author of *Altered Carbon* and *Broken Angels*—a turbocharged new thriller set in a world where killers are stars, media is mass entertainment, and freedom is a dangerous proposition . . . A coup in Cambodia. Guns to Guatemala. For the men and women of Shorn Associates, opportunity is calling. In the superheated global village of the near future, big money is made by finding the right little war and supporting one side against the other—in exchange for a share of the spoils. To succeed, Shorn uses a new kind of corporate gladiator: sharp-suited, hard-driving gunslingers who operate armored vehicles and follow a Samurai code. And Chris Faulkner is just the man for the job. He fought his way out of London's zone of destitution. And his kills are making him famous. But unlike his best friend and competitor at Shorn, Faulkner has a side that outsiders cannot see: the side his wife is trying to salvage, that another woman—a porn star turned TV news reporter—is trying to exploit. Steeped in blood, eyed

by common criminals looking for a shot at fame, Faulkner is living on borrowed time. Until he's given one last shot at getting out alive. . . .

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic

researchers.

New York Times bestseller! "Few are better positioned to illuminate the vagaries of this transformation than Galloway, a tech entrepreneur, author and professor at New York University's Stern School. In brisk prose and catchy illustrations, he vividly demonstrates how the largest technology companies turned the crisis of the pandemic into the market-share-grabbing opportunity of a lifetime." -
-The New York Times "As good an analysis as you could wish to read." --The Financial Times
From bestselling author and NYU Business School professor Scott Galloway comes a keenly insightful, urgent analysis of who stands to win and who's at risk to lose in a post-pandemic world The COVID-19 outbreak has turned bedrooms into offices, pitted young against old, and widened the gaps between rich and poor, red and blue, the mask wearers and the mask haters. Some businesses--like home exercise company Peloton, video conference software maker Zoom, and Amazon--woke up to find themselves crushed under an avalanche of consumer demand. Others--like the restaurant, travel, hospitality, and live entertainment industries--scrambled to escape obliteration. But as New York Times bestselling author Scott Galloway argues, the pandemic has not been a change agent so much as an accelerant of trends already well underway. In *Post Corona*, he

outlines the contours of the crisis and the opportunities that lie ahead. Some businesses, like the powerful tech monopolies, will thrive as a result of the disruption. Other industries, like higher education, will struggle to maintain a value proposition that no longer makes sense when we can't stand shoulder to shoulder. And the pandemic has accelerated deeper trends in government and society, exposing a widening gap between our vision of America as a land of opportunity, and the troubling realities of our declining wellbeing. Combining his signature humor and brash style with sharp business insights and the occasional dose of righteous anger, Galloway offers both warning and hope in equal measure. As he writes, "Our commonwealth didn't just happen, it was shaped. We chose this path--no trend is permanent and can't be made worse or corrected."

The World Is Flat [Further Updated and Expanded; Release 3.0] McGraw-Hill/Irwin

The goal of Thomas and Maurice's *Managerial Economics* is to teach students the economic way of thinking about business decision and strategy. This edition continues to develop critical thinking skills and provides students with a logical way of analysing both the routine decisions of managing the daily operations of a business as well as the longer-run strategic plans that seek to manipulate the actions and reactions of rival firms.

Managerial Economics is a self-contained textbook that requires no previous training in economics. While maintaining a rigorous style, this book is designed to be one of the most accessible books in managerial economics from which to teach and learn because of its clarity of presentation and strong end of chapter problems. Rather than parading students quickly through every interesting or new topic in microeconomics and industrial organization, this 11th edition instead carefully develops and applies the most useful concepts for business decision making and strategic planning.

It is no secret that America's sentencing and corrections systems are in crisis, and neither system can be understood or repaired fully without careful consideration of the other. This handbook examines the intertwined and multi-layered fields of American sentencing and corrections from global and historical viewpoints, from theoretical and policy perspectives, and with close attention to many problem-specific arenas. Editors Joan Petersilia and Kevin R. Reitz, both leaders in their respective fields, bring together a group of preeminent scholars to present state-of-the-art research, investigate current

practices, and explore the implications of new and varied approaches wherever possible. The handbook's contributors bridge the gap between research and policy across a range of topics including an overview of mass incarceration and its collateral effects, explorations of sentencing theories and their applications, analyses of the full spectrum of correctional options, and first-hand accounts of life inside of and outside of prison. Individual chapters reflect expertise and source materials from multiple fields including criminology, law, sociology, psychology, public policy, economics, political science, and history. Proving that the problems of sentencing and corrections, writ large, cannot be addressed effectively or comprehensively within the confines of any one discipline, *The Oxford Handbook of Sentencing and Corrections* is a vital reference volume on these two related and central components of America's ongoing experiment in mass incarceration.

The Iran-Iraq war broke out in September 1980. It brought death and suffering to hundreds of thousands of people on both sides and devastated the economies of both countries. It also increased international tensions by precipitating new alliances and rearrangement of forces in the already turbulent Middle East. The focus of this book is on the historical, economic and political dimensions of the war between Iraq and Iran. It examines many aspects of what proved to be a very complex conflict; including its long history, its present economic and political setting, the different responses to the war by outside parties and its regional and world implications.
