Essay from the year 2017 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1.8, language: English, abstract: In the contemporary world, there is no business without communication. To most entrepreneurs in the 21st century, social media use in business is seemingly the "next big thing". The emergence of an online technology that allows reaching of big crowds without necessarily meeting them has presented a temporary yet essential fad that ought to be appropriately made use of while it is still in the spotlight. To this group of entrepreneurs, reaching out the virtual market has presented itself as a stepping-stone to, not only establish their brands, but also to make it earn acceptance in the market. Others have even gone further to establish online shops where customers can easily order and wait for their products to be delivered without having to necessarily visit the product stores. Unfortunately, however, there exists a population to which social media marketing is a buzzword without any practical advantage and steep. They envision it to be a complicated learning curve that further makes their business life unexpectedly complex. With regards to the different approaches to social media, this paper will look at both the negative and the positive aspects of using social media as a tool for running business operations.

Abstract This thesis explores the advantages and limitations of online mentorship with students who are developing their portfolios for university admission. The research included 10 participants aged 18 to 19 at the time the research began. As of July 24th, 2016, six students have been accepted to the school they applied, two students have not replied my query regarding their acceptance, and the rest of the two students are continuously developing and refining their portfolios for 2017/18 entries. This Design- Based Research went through four iterations. Each iteration included adjustments to workshop content and social media platforms. They were also adjusted to optimize teaching and learning efficacy. The results of the collected data revealed the affordances and limitations of the online mentorship activities. The affordances include the improvement of artistic abilities through constant practice, recurring feedback exchange, increased motivation through social recognition, and identity formation. At the other end of the spectrum, the limitations include lesson content delivery methods, students over-dependence on the teacher-researcher, and

distractions that come with using mobile phones. This research concludes that this form of online mentorship in the field of art education is worthy of continued investigation and refinement, which can enhance the noted affordances and address the limitations that were noted in this study.

An inspiring yet practical guide for transforming limitations into opportunities A Beautiful Constraint: How to Transform Your Limitations Into Advantages And Why It's Everyone's Business Now is a book about everyday, practical inventiveness, designed for the constrained times in which we live. It describes how to take the kinds of issues that all of us face today—lack of time, money, resources, attention, know-how—and see in them the opportunity for transformation of oneself and one's organization's fortunes. The ideas in the book are based on the authors' extensive work as business consultants, and are brought to life in 35 personal interviews from such varied sources as Nike, IKEA, Unilever, the U.S. Navy, Formula One racecar engineers, public school teachers in California, and barley farmers in South Africa. Underpinned by scientific research into the psychology of breakthrough, the book is a practical handbook full of tools and tips for how to make more from less. Beautifully designed and accessible, A Beautiful Constraint will appeal beyond its core business audience to anyone who needs to find the opportunity in constraint. The book takes the reader on a journey through the mindset, method and motivation required to move from the initial "victim" stage into the transformation stage. It challenges us to: Examine how we've become path dependent—stuck with routines that blind us from seeing opportunity along new paths Ask Propelling Questions to help us break free of those paths and put the most pressing and valuable constraints at the heart of our process Adopt a Can If mentality to answer these questions—focused on "how," not "if" Access the abundance to be found all around us to help transform constraints Activate the high-octane mix of emotions necessary to fuel the tenacity required for success We live in a world of seemingly ever-increasing constraints, driven as much by an overabundance of choices and connections as by a scarcity of time and resources. How we respond to these constraints is one of the most important issues of our time and will be a large determinant of our progress as people, businesses and planet, in the future. A Beautiful Constraint calls for a more widespread capability for constraint-driven problem solving and provides the framework to achieve that.

The goal of this book is to teach you the simplest and most practical ways of using astrology to recognize the influences the celestial bodies are having on us and how they relate to people, places, things according to time, color, appearance (i.e., how one looks or when one arrives), the topic of conversation and more. This is not a long, drawn-out course and I am not going to razzle-dazzle you with a bunch of symbol-laden charts accompanied by astrological jargon that requires a glossary ofastrological terms (though I provide one). This short course is meant to be an easy, fun, entertaining, and rewarding experience.

Seminar paper from the year 2008 in the subject Business economics - Accounting and Taxes, grade: 2,0, University of Glamorgan, 14 entries in the bibliography, language: English, abstract: Sustainability is developing in as important target for an increasing number of industries and governments. Especially in a faster moving world, which is determined by quarterly period reports, a long term orientation can be a competitive advantage for unlisted companies. In the 1960's by the US Department of Defense began to develop a tool to handle increasing costs. They recognised that the purchase price was not the only important criteria. Training or maintaining costs had to be considered for the total cost calculation, too. However, several definitions of Life cycle costing (LCC) exist that tend to be similar: 'monitoring the cost incurred throughout a product's life cycle' (Woodward, 1997) or 'LCC is the sum of all costs incurred during the life cycle of a building, system or product. It includes the costs of the project, development, acquisition, operation, conservation and maintenance and salvage value if it exists.' (Goralczyk, and Kulczycka, 2005). In the following essay several functions of life cycle costing will be drawn up. Furthermore, advantages, disadvantages and criticism of this procedure will be analysed.

The Seminarium

The American Anti-Vivisection Society (AAVS) petitioned the National Institutes of Health (NIH) on April 23, 1997, to prohibit the use of animals in the

production of mAb. On September 18, 1997, NIH declined to prohibit the use of mice in mAb production, stating that "the ascites method of mAb production is scientifically appropriate for some research projects and cannot be replaced." On March 26, 1998, AAVS submitted a second petition, stating that "NIH failed to provide valid scientific reasons for not supporting a proposed ban." The office of the NIH director asked the National Research Council to conduct a study of methods of producing mAb. In response to that request, the Research Council appointed the Committee on Methods of Producing Monoclonal Antibodies, to act on behalf of the Institute for Laboratory Animal Research of the Commission on Life Sciences, to conduct the study. The 11 expert members of the committee had extensive experience in biomedical research, laboratory animal medicine, animal welfare, pain research, and patient advocacy (Appendix B). The committee was asked to determine whether there was a scientific necessity for the mouse ascites method; if so, whether the method caused pain or distress; and, if so, what could be done to minimize the pain or distress. The committee was also asked to comment on available in vitro methods; to suggest what acceptable scientific rationale, if any, there was for using the mouse ascites method; and to identify regulatory requirements for the continued use of the mouse ascites method. The committee held an open data-gathering meeting during which its members summarized data bearing on those questions. A 1-day workshop (Appendix A) was attended by 34 participants, 14 of whom made formal presentations. A second meeting was held to finalize the report. The present report was written on the basis of information in the literature and information presented at the meeting and the workshop.

Globalization. Advantages and Disadvantages

Seminar paper from the year 2013 in the subject Economics - International Economic Relations, grade: 2,0, University of applied sciences Frankfurt a. M., course: Advanced Business English, language: English, abstract: Globalization is one of the major topics and challenges of our time. It describes the process of the worldwide increasing interconnection of economy, politics, culture and environment. This compression affects individuals, society and institutions as well as countries. It can help to increase prosperity, social justice and global networking in order to make the world more equal. In the following seminar paper, the prime importance will be the look at the effects of globalization on the world economy in general. Despite the advantages of globalization, the negative side with all the disadvantages should not be neglected. Therefore, it is essential to look at the advantages

and disadvantages that are created by globalization. The question is to ask, if globalization really has the force to make the world more equal and who are the winners or the losers of it? The available seminar paper tries to answer that question with a critical analysis of the topic. Chapter two pays attention to the fact what globalization really is and tries to identify the major characteristics of globalization. Chapter three concentrates on the consequences and effects of globalization on the world economy. The fourth chapter tries to identify the advantages and disadvantages. The seminar paper ends with a short result in chapter five, providing a short summary of the whole theme.
