today's most popular evangelical Bible editions. Together, the New King James Version and New International Version represent the two major approaches to modern Bible translation. The New King James Version, an updating of the renowned King James Version, is technically known as a formal equivalent translation (often referred to as "word-for-word"). This means that scholars rendered the

Hebrew, Aramaic and koine Greek of the biblical text into English that is as close as possible to its original meaning. The result is a translation that is particularly valuable for careful analysis of the text. The New International Version represents the "thought-for-thought" school of Bible translation (technically known as dynamic or functional equivalent). This method places the

priority on the intended meaning of the original vocabulary, adapting it to English syntax and grammar. Such a translation tends to be easier to read and understand. The NKJV and NIV texts are arranged in two columns on each page of the Contemporary Parallel Bible, enabling readers to easily compare the word and phrasing choices made by the scholarly committees that brought these highly regarded translations into being. *NKJV Bible Journal - James, Comfort Print* Thomas Nelson The standard editions of the 1611 King James Bible (or Authorised Version) currently available give, with little variation, the text as established by the Oxford edition of 1769. They give the reader, therefore, a seventeenth-century text in mid-eighteenth century clothes - clothes which are neither original nor modern. In this new edition of the King James Version the text has been collated with the translators' original work in order to give the reader as closely as possible the exact text on which the translators decided. It has also been given consistent modern spelling and presentation in order to

make it easier to read and study than standard editions. The text is presented in paragraph form, with marginal notes. The type is 10/12.5 Swift.
