With Computational Thinking in Sound, veteran educators Gena R. Greher and Jesse M. Heines provide the first book ever written for music fundamentals educators that is devoted specifically to music, sound, and technology. Using a student-centered approach that emphasizes project-based experiences, the book provides music educators with multiple strategies to explore, create, and solve problems with music and technology in equal parts. It also provides examples of hands-on activities that encourage students, alone and in groups, to explore the basic principles that underlie today's music technology and freely available multimedia creation tools. *Computational Thinking in Sound* is an effective tool for educators to introduce students to the complex process of computational thinking in the context of the creative arts through the more accessible medium of music.

The Richest Man In Babylon John Wiley & Sons

What does Gerry Anderson's television series SPACE 1999 have in common with Carl Sagan's award-winning television documentary COSMOS? Not very much, one might expect, but this book documents an Online Alpha discussion where fans of the science fiction series discuss and debate differences and similarities from a wide range of perspectives, some of them arguing that two series may be so closely connected that it might be natural to think of COSMOS as the third year of SPACE 1999. This book is written on an idealistic basis. It is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at www.lulu.com.

customers. That's why I can heartily recommend this book. Go out and write some great apps...and keep this book handy." —From the Foreword by Jeff Prosise

Build Exceptionally Immersive and Responsive Touch-Based Windows Store Apps for Windows 8 with C# and XAML This is the first practical guide to building breakthrough applications for Windows 8 from project templates through publication to the new Windows Store. Microsoft "MVP of the Year" Jeremy Likness helps you combine your existing developer skills with new Visual Studio 2012 tools and best practices to create apps that are intuitive and innovative. His guidance and insight will help you dive into Windows 8 development—and gain a powerful competitive advantage for years to come. Likness illuminates the entire apps lifecycle, from planning and Model-View-View Model (MVVM) based design through coding, testing, packaging, and deployment. He covers both business and consumer apps, showing how Windows 8/WinRT development builds upon and contrasts with older WPF and Silverlight approaches. Using carefully crafted downloadable code examples and sample projects, Likness shows how to make the most of new platform features, including integrated social networking, search, contracts, charms, and tiles. Throughout, he addresses crucial development challenges that have only been discussed on MSDN, blog posts, and Twitter feeds—and never with this depth and clarity before. Coverage includes

- Mastering real-world Windows 8 development for all devices and form factors
- Understanding the new WinRT framework and the unique characteristics of Windows 8 apps
- Designing apps that are faster, more responsive, do more with less, and

- maximize battery life
- Creating exceptionally fluid interfaces with VS 2012 templates, built-in animations, and XAML
- Building apps that respond consistently to multiple forms of input, including complex touch manipulations
- Using contracts and charms to expose services or enable users to do so
- Providing information to users through Live Tiles even when your app isn't running
- Connecting your app seamlessly to multiple data sources, including social networks and cloud storage
- Syndicating rich, network-based content
- Using Model-View-ViewModel (MVVM)
- Securing Windows 8 apps through authentication and authorization
- Efficiently testing, debugging, packaging, and deploying apps
