Introduction to Islamic Banking and Finance is a succinct guide to the key characteristics of Islamic banking highlighting how these differ from conventional banking. This detailed book illustrates how Islamic banking is consistent with the Sharia'a, a key

element of which is the prohibition on collecting and paying interest. This central religious precept appears to rule out most aspects of modern finance but it does allow money to be used for trading tangible assets and business, which can then generate a profit. Brian Kettell's book looks at all aspects of Islamic banking, including chapters on its creation and evolution through to detailed discussions of the issues involved in the Sharia'a contracts of Murabaha, Mudaraba, Musharaka, Ijara, Istisna'a, and Salam. Islamic insurance (Takaful) is also covered. Finally the book takes a look at Sharia'a law and Sharia'a boards, indicating the roles and responsibilities that come with membership. Islamic banks have been operating in places such as Bahrain, Saudi Arabia, Malaysia and Dubai for some time. Conventional bankers have traditionally viewed the sector as a small, exotic niche but recent years have seen a dramatic surge in popularity. A number of Western investment banks have started working with Muslim clerics to create new ranges of financial products designed for devout Muslims, a large and growing market. Although estimates of the size of the

Islamic finance industry vary greatly, everyone agrees that it is expanding rapidly and this is the perfect book for anyone looking to understand the industry.

Gendered Morality Brill Academic Pub
This book discusses the idea that there is a specific Islamic form of entrepreneurship. Based on extensive original research amongst small and medium sized enterprises in Saudi Arabia, it shows how businesses are started and how they grow in the context of an Islamic economy and society. It argues that as specific Islamic approaches to a wide range of economic activities are being formulated and implemented, there is indeed a particular Islamic approach to entrepreneurship. Examining the relationship between Islamic values and entrepreneurial activity, the book considers whether such values can be more effectively used in order to raise the profile of Islamic entrepreneurship, and also to promote alternatives to development in the contemporary business environment. The book analyses the nature of entrepreneurship, and the special qualities of Islamic

entrepreneurship, and discusses how the Islamic approach to entrepreneurship can be encouraged and developed further still

This book presents a variety of discussions from different countries about regulations and applications of ethics in business practice. It demonstrates how Ethics, both in the world of business and in academic life, is consistently a central and unavoidable issue that institutions must devise new regulations on a regular basis to address. Given that applying such regulations becomes complicated in a global business landscape and that International companies have lost large amounts of revenues due to fraudulent activities, the book provides insights for professionals in business world to teach, learn, apply, measure and report on companies' daily business. Business and Professional Ethics: Theories, Standards, and Analysis is essential reading for researchers and students in business schools around the world.

China and Islam examines the intersection of two critical issues of the contemporary world: Islamic revival and an assertive China, questioning the assumption that Islamic law is incompatible with state law. It finds that both Hui and the Party-State invoke, interpret, and make arguments based on Islamic law, a minjian (unofficial) law in China, to pursue their respective visions of 'the good'. Based on fieldwork in Linxia, 'China's Little Mecca', this study follows Hui clerics, youthful translators on the 'New Silk Road', female educators who reform traditional madrasas, and Party cadres as they reconcile Islamic and socialist laws in the course of the everyday. The first study of Islamic law in China and one of the first ethnographic accounts of law in postsocialist China, China and Islam unsettles unidimensional perceptions of extremist Islam and authoritarian China through Hui minjian practices of law.

The Principles of Islamic Marketing

International Institute of Islamic Thought (IIIT)

The present work attempts to answer the

question: what characterizes a Muslim? the author answers by saying that the Qur'an lays down a set of principles to provide guidance for the conduct of a Muslim businessman. this guidance consists not merely of "laws," but also of ethical norms. thus, a Muslim is urged not only to give others their due; rather to give even more than what one legally owes them so as to fulfill the requirements of benevolence and magnanimity. Likewise, he is expected not only to shun all that is prohibited, but also to abstain from actions about which his conscience does not feel fully at rest. The author emphatically argues that the Islamic worldview, with its emphasis on hereafter, fosters an outlook which significantly differs from that prevalent in the present times. Moreover, it is God's will as revealed to the prophets rather than the frail reason of human beings to which one ought to primarily turn for guidance. In sum, the business ethics of Islam have a distinct entity both in terms of its underlying spirit and its content.

Since the financial crisis of 2007/2008, a renewed discussion on the ethics and

finance is being examined from different dimensions – finance for good society, responsible finance, ethical finance, financial crimes, and financial repression. The principal objective of this Handbook on Ethics of Islamic Economics and Finance is to provide a deeper understanding of the ethical underpinning of Islamic economics and finance. The reader will notice that the Handbook reflects a diversity of views on the subject of economic and business ethics in Islam across the intellectual spectrum of Muslim thought over the globe. Handbook attempts to find answers to some questions concerning the definition and characteristics of the ethical system in Islam. What is its goal and how do its rules and practices ensure welfare for individuals and society? Are the moral principles universal and invariable or do they change and adapt with the social changes of communities and progress in science and technology? Is the present generation accountable for the welfare of future generations? Where is the boundary between law and ethics and who guarantees their adoption and implementation?

The Handbook of Business Ethics: Philosophical Foundations is a standard interdisciplinary reference handbook in the field of business ethics. Articles by notable philosophers and economists examine fundamental concepts, theories and questions of business ethics: Are morality and self-interest compatible? What is meant by a just price? What did the Scholastic philosophers think about business? The handbook will cover the entire philosophical basis of business ethics. Articles range from historical positions such as Aristotelianism, Kantianism and Marxism to systematic issues like justice, religious issues, rights and globalisation or gender. The book is intended as a reference work for academics, students (esp. graduate), and professionals.

Leaders nowadays need to know, learn, and apply the concept of qalb leadership where it has been taught by the Prophet Muhammad as well as explained by Islamic scholars. The comparison with other mindful leadership concepts is

required to provide solutions and options in leadership for better outcomes and spiritual awareness. It is found that leadership literature, in general, is unable to generate an understanding of a leadership concept that is both intellectually compelling and emotionally satisfying. As for qalb leadership, it focuses on the spirituality of leadership that can aid in facing unpredictable manners and provide better outcomes for followers. Research on Islamic leadership and spirituality may pave the way for better leadership practices in the future. The Role of Islamic Spirituality in the Management and Leadership Process will elaborate the spirituality and qalb in human life and leadership along with providing a discussion on the role and function of qalb in the overall leadership process. Through spirituality, human interdependence, creativity, and social justice can be created and molded. This type of leadership enables transformation in a natural way without denying basic human nature and imparts balance to both the outer and inner needs of humans. With the discussion of four cardinal virtues of Al-Ghazali, leaders can solve many

problems that emerge in their organizations. This book is ideal for managers, executives, theologians, professionals, researchers, academicians, and students who are interested in how Islamic spirituality plays a role in leadership.

"Empires are not an under-researched topic. Recently, there has been a veritable surge in comparative and conceptual studies, not least of pre-modern empires. The distant past can tell us much about the fates of empires that may still be relevant today, and contemporary historians as well as the general public are generally aware of that. Tracing the general development of an empire, we can discern a kind imperial dynamic which follows the momentum of expansion, relies on the structures and achievements of the formative period for a while, and tends to be caught in a downward spiral at some point. Yet single cases differ so much that a general model is hardly ever sufficient. There is in fact little consensus about what exactly constitutes an empire, and it has become standard in publications

about empires to note the profusion of definitions. Some refer to size-for instance, 'greater than a million square kilometers', as Peter Turchin suggested. Apart from that, many scholars offer more or less extensive lists of qualitative criteria. Some of these criteria reflect the imperial dynamic, for instance, the imposition of some kind of unity through 'an imperial project', which allows moving broad populations 'from coercion through co-optation to cooperation and identification'--

Islamic Business Finance is based on strong ethical regulations as suggested by Islamic Literature, such as the Quran and the Traditions of the Prophet of Islam, and could be considered as a subclass of the wider subject of ethical standards in business. This book highlights the basic principles of Islamic Business ethics and their implication in today's global business environment. It highlights the most important features of Islamic banking and finance in relation to the core principles of Shariah law. It is the most comprehensive book to date, in terms of the number of

Quranic verses and traditions of the Prophet relating to this subject, which are interspersed throughout the text. It explains how ethics are defined both in general terms and within the context of an Islamic perspective. In addition, it provides a logical interpretation of Islamic principles of business ethics, while keeping in view throughout the use of contemporary business practices. Topics such as digital currencies, money laundering, etc. are discussed at length. This book also discusses the new and emerging ethical issues faced by business and industry globally. This book will be a valuable reference guide for students, teachers and researchers of Islamic banking and finance.

Professors of accounting--one British and one Kuwaiti--challenge western businessmen's assumed superiority over Arabic traders and hagglers. The reason, they say, that there is no clearly defined and generally accepted set of accounting principles in the west, is that there is no ethical basis for judging and recording

transactions that are at least partly designed to deceive. Islam, they contend, provides such a basis, which does not require a belief in the religion to make use of. They show how the principles have been and are now applied. For academics and practicing accountants. Annotation copyrighted by Book News, Inc., Portland, OR

Handbook of Ethics of Islamic Economics and Finance Routledge

The Handbook of Research on Islamic Business Ethics is an essential source for policymakers and researchers to gain an understanding of pressing ethical issues in the Islamic business world. The primary objective is to provide readers with an insight into the ethical principles that govern Islamic business conduct. These principles are articulated with a view to evaluating whether business actors uphold their social responsibilities and are committed to ethical values in their conduct. Exploring the interweaving relationship between Islamic business ethics and the market, this Handbook

examines the critical role that ethics can play in ensuring that business thrives. It offers theoretical perspectives on research and goes beyond the conventional treatment of Islamic ethics. It debates important market issues and asserts that social actors in the Islamic business world should be cognisant of these issues so as to behave in a moral and responsible manner. Implications for researchers and for market conduct are illuminated. Readers wanting to familiarize themselves with day-to-day Islamic business ethics will find this Handbook an invaluable guide.

Master's Thesis from the year 2016 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, , course: Islamic banking, language: English, abstract: This study was primarily designed to review the impact of Islamic Work Ethics on employees' job performance; this is because of the persistent immoral concerns in the society and corporations like dishonesty, fraud, sexual harassment, etc. The elements of Islamic work ethics for this study cover honesty, rewards, commitment and satisfaction only. The study specifically focuses on UUM administrative staff. In order to achieve the research objectives, the study employ a quantitative research method, mainly survey where questionnaires were distributed to the respondents. The research population is UUM administrative staff in Sintok main campus. The study is significant to the body of knowledge, policy makers, practitioners and academicians. Since most of literatures on perceived benefits of Islamic work ethics are theoretical, this

study will add on the stock of knowledge on Islamic ethics through empirical contributions. Therefore, it will contribute to knowledge on this field. Policy makers and Islamic corporations can design their code of ethics to incorporate Islamic values and this will have great positive impact on their performance as well as economic growth. Future researchers can explore more on other variables as well as expand the size of the study in order to contribute more to knowledge. Ethics and morality are core values of all divine religions. All divine religions that are revealed by Allah to His messengers with divine books promote ethics and morality. According to Mayne ethics runs deeper than the internal compass and describes a social system or societal structure of moral codes that govern virtuous action. From a secular perspective, ethics change from group to group and society to society. But from the Christian perspective, ethics should be concrete and governed by God. Christian ethics does not change from society to society, as secular moral codes may do, Christians are a single group

adhering to the ethical code of the Bible, rather than multiple sects adhering to differing laws and customs.

Ethical Theories in Islam Walter de Gruyter GmbH & Co KG

In this new book, Tariq Ramadan argues that it is crucial to find theoretical and practical solutions that will enable Western Muslims to remain faithful to Islamic ethics while fully living within their societies and their time. He notes that Muslim scholars often refer to the notion of ijihad (critical and renewed reading of the foundational texts) as the only way for Muslims to take up these modern challenges. But, Ramadan argues, in practice such readings have effectively reached the limits of their ability to serve the faithful in the West as well as the East. In this book he sets forward a radical new concept of ijihad, which puts context -- including the knowledge derived from the hard and human sciences, cultures and their geographic and historical contingencies -- on an equal footing with the scriptures as a source of Islamic law.
